StreamKit / **Home** / **Administration**

Channel management

📎 5 Added by Cosmin Stanciu, last edited by Cosmin Stanciu on Aug 29, 2013 (view change)

⚙ Tools ▾

The administration area offers all tools necessary to stream, record, publish and monitor channel's media presence.

- Start broadcasting
  - Flash Media Live Encoder
  - Wirecast
- Dashboard
  - Live Preview
  - Live Stats
  - Recording
- Live player
  - Embed code
- Video library
- Facebook

Start broadcasting

In order to be able to start broadcasting a software or hardware encoder must be used. We'll guide you on how to use two of the most well known software live encoders:

Flash Media Live Encoder

It's free and it can be downloaded online after registering with an Adobe account.

A configuration file for the FMLE can be downloaded from this location:

API - Integration

StreamKit / Home / Development

Public API

Hinzugefügt von Dragos Dascalita, zuletzt bearbeitet von Cosmin Stanciu am Nov 17, 2013 (Änderung anzeigen)

⚙ Extras ▾

StreamKit comes with a very simple API to manage channels and videos.

API output is in JSON format so that it makes it easy to work with it in javascript.

- Video Channel
- Video Library - listing and searching videos
    - Query parameters
        - Navigation
    - Video Albums
        - Video Albums - get all albums
        - Video Albums - listing and searching videos
- Video content
    - JSON content info path
    - HTTP Live Streaming path
    - Adobe RTMP streaming path
    - MP4 path
    - MPEG-Dash
    - Rendered browser player
    - Thumbnails
- Adding new content
- Editing existing content

Active churches

The Lord now calls upon Seventh-day Adventists in every locality to consecrate themselves to Him and to do their very best, according to their circumstances, to assist in His work.
